

VNS2

Convincing technology for the tough conditions.

Our VNS2 is the big brother of our proven pioneer VNS0. It was developed especially for tough mechanical and environmental operating conditions. It is available as single or multi-axis controller or in conjunction with special handles as 3-axis version. The intelligent modular system permits the mounting of contact blocks in X, Y or Z direction, each with up to 12 double contact elements. Milled cams, programmed from our standard portfolio or customized, control the powerful

DC, AC or gold contacts. Of course, the master switch with encoders, potentiometers or handles can be completed from our huge range of products. The 12 mm hollow handle stem of special alloy, an aluminum rosette, the metal gears and a drive block casting contribute to the estimated steel plant operators and crane manufacturers robustness and durability.
