

UGN

Hand rest included.

The UGN, which is the smallest handle of our UG series, can be equipped with various components like its bigger brothers. Please take in mind that not all positions can be used at the same time. With its small, compact design, it is easy to operate. All pushbuttons

and rocker switches are easily reached without changing the grip position.

The UGN can be configured for either left-handed or right-handed application.

Version

UGN

Handle with hand rest, adapter 8, without inserts

Inserts/Options

Pushbuttons, rocker switches, hand detection sensor, minijoysticks, thumb wheels, potentiometer
